## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28, drawn to a "Tissue product," classified in class 428, subclass 195.
  - II. Claims 29-44, drawn to a "Method of making tissues," classified in class 162, subclass 109.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, such as the dry method, i.e., air-laid.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Sue Watson on June 23, 2003 a provisional election was made without traverse to prosecute the invention of group II, claims 29-44. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### **EXAMINER'S AMENDMENT**

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sue Watson on June 26, 2003.

The application has been amended as follows:

The Title has been changed to –Method of Making a High Utility Tissue--.

Non-elected claims, claims 1-28 were cancelled.

In claims 31 and 41, line 2, “amonoethylethanolamine” has been changed to –aminoethylethanolamine--.

7. The following is an examiner's statement of reasons for allowance: the prior art does not teach nor suggest the use of a repellant and a debonder agent at the wet end of a tissue making operation. Note that repellant has been interpreted as defined in page 1, lines 20-26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
